Instructions

^ COLLAPSE ^

Implement the Milestone 3 features from the project's proposal document: <https://docs.google.com/document/d/1ONmvEvel97GTFPGfVwwQC96xSsobbSbk56145Xi>
Make sure you add your ucid/date as code comments where code changes are done
All code changes should reach the Milestone3 branch
Create a pull request from Milestone3 to main and keep it open until you get the output PDF from this assignment.
Gather the evidence of feature completion based on the below tasks.
Once finished, get the output PDF and copy/move it to your repository folder on your local machine.
Run the necessary git add, commit, and push steps to move it to GitHub
Complete the pull request that was opened earlier
Upload the same output PDF to Canvas

Text: Explain how the formatting was made to be visible/rendered in the UI

iDetails:
Note each scenario

The `SpecialCharacter` method takes a message string and applies various formatting rules using regular expressions. It swaps out certain patterns with matching HTML tags, such as asterisks for bold, hyphens for italic, and underscores for underlining. It also manages more complicated scenarios like custom color tags and nested formatting. In the end, the technique converts unformatted text into text that is ready to be displayed in a user interface, enabling a more effective visual depiction of the message content.
